An enthusiastic reader loaned us this photo of a VAH-21 AP-2H *Neptune* conducting trails and roads interdiction during the Vietnam War. He commented, "I read with great interest the article in the July–August 1998 issue entitled 'The Earthman Cometh' by Ron Whittaker. Having spent 28 years in the Navy, I have not seen much written about the very advanced sensor system used and tested in combat on these aircraft."
